

Amadeus Quick-Connect (AQC)

Quick reference guide

Amadeus Quick-Connect description

Product Definition

Amadeus Quick Connect is a set of simple webservices that allows travel agents to create a complete search → book → pay flow, covering all airlines distributed by Amadeus as well as an exclusive list of low-cost carriers in a few weeks.

Product Vision

The vision behind Quick-Connect is to enable our Travel Sellers to access the wide variety of different fares sources like EDIFACT, NDC, Light Ticketing and Low-Cost Carrier Content, but leaving the complex orchestration to Amadeus and delivering a response in a unique, normalized way.

[Key Benefits]

- ✓ Quick to integrate in just 4-6 weeks
- ✓ Easy to develop upon due to REST/JSON API
- ✓ No in-depth technology knowledge required
- ✓ All fare sources covered and orchestrated

[For whom does the product fit?]

Quick-Connect it meant to be sold to small to mid-sized travel sellers. But even for larger organizations, it can make sense to offer AQC if the requirements aren't too complex, and the limitations are accepted.
